THUNDER ELITE

2024-2025 Elite Hair

Start with clean and washed hair. Place your ponytail 4 fingers from the top of the hairline. Use lots of product to secure down all the fly away and stray hairs.

Once all the fly aways are cleaned up, place in your bow in the desired spot and secure with the attached ponytail.

Curl the pony after placing in your bow. Curls need to be neat and clean! Use lots of hair spray so the curls stay put for the performance.

Don't forget to accessorize the look with your killer facials!
